## Caralynn's Corner

by Caralynn Cullen

FYI. Last week we brought in a new rough unit to demo and didn't realize until after the fact that the height of cut was set a little bit lower than what we normally would maintain the secondary rough at. After looking at the quality of cut it left, I have decided to leave it at that height for the remainder of the year. If anyone feels they like the rough longer (back to normal), please let me know and we can raise it back up ASAP...lol Caralynn
